

KIRK 4020 / 4040 / 4080
DECT handsets

Creating Wireless Communities

Delivering ► functionality ► durability ► quality

Latest technology → HIGHEST LEVELS OF QUALITY

Now in their fifth generation, KIRK DECT handsets deliver the latest technology at the highest levels of quality. Excellent voice quality is combined with mechanical robustness, ensuring KIRK handsets survive the harshest environments. All handsets are backwards compatible, allowing new models to be used alongside older handsets on existing sites. KIRK handsets comply with the DECT GAP standard, making them compatible with virtually all existing and future compliant DECT systems.

Functionality → TO SUIT ALL USERS

Whether the application is retail, healthcare, manufacturing, logistics, hospitality or office use, KIRK is the handset of choice by providing truly useful features.

USEFUL FEATURES INCLUDE:

- **Backlit graphic display and text messaging support.**
Handsets are able to receive and store text messages when integrated** with messaging systems, Nurse Call systems or alarm interfaces.
- **Shock, dust and water resistance.**
Handsets comply with IEC standards for drop, bump and vibration. Additionally, both the 4040 and 4080 have IP industrial ratings, enabling operation in harsh environments, where standard phones would fail.
- **Alarm Button for enhanced Personal Security**
Users are able to summons assistance by simply pressing the handsets' integrated alarm button.** Basic location information is supplied as part of the alarm message that is generated.

Easy access to the volume keys is an integrated part of the design

Numbers are moulded into the keys and will never wear off

Prevention of humidity in the handset by covering the headset jack with a rubber seal

Integrated alarm button to summons assistance
